GENERAL: PB-576S is a laser-printable (satin side only) satin polyester with an acrylic primer coat on the back side. PB-576S demonstrates a superior punching property, excellent smoothness of hand, and fair resistance against fadeout of imprinting from repeated commercial washings and dry cleanings. The product is also non-fraying, highly resistant to shrinking or curling, and effectively resistant to degradation from rot, mildew, and perspiration.

Printing Methods: Laser (Dry Toner), Dot Matrix, Hot Stamping, and other impact-style print methods.
